Free hens from cages

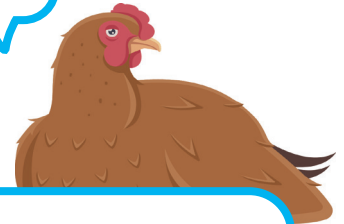

**It's time to put the chicken before the egg
and finally ban the caging of hens in New Zealand**

What do we want?

We want the Government to ban all caged hen farming in New Zealand and empty Aotearoa's cages for good.

Why do we want it?

Hens are clever, curious and social birds. Outside, they love to spend their days scratching for food, dustbathing and basking in the sun.

Today in New Zealand over 1.2 million hens are trapped inside colony cages for their whole lives. With up to 80 hens in each cage, each hen is forced to live her whole life in a space about the size of this A4 piece of paper! She can't stretch her wings, move freely or comfortably rest. She will never see the sky or walk on grass. **These hens deserve a life worth living.**
